

COMPANY POLICY

ENVIRONMENTAL POLICY

This policy sets out how ATKINSONS (NE) Limited manages the environmental impact of its work, its vehicles and its waste.

REFERENCE	VERSION	ISSUED	NEXT REVIEW
ATK-POL-03	1.0	26 September 2026	26 September 2027

1. STATEMENT OF INTENT

ATKINSONS recognises that building and maintenance work affects the environment, and is committed to reducing that impact wherever it is practical to do so.

We will comply with all applicable environmental legislation as a minimum.

2. WASTE

We meet our duty of care for waste under the Environmental Protection Act 1990. Waste is removed by licensed carriers to permitted sites, with waste transfer records kept.

Materials are separated and recycled where practical, including metals, timber, cardboard, plasterboard and inert waste.

Hazardous waste, including asbestos, is identified, handled and disposed of only by those competent to do so, in line with the relevant regulations.

3. VEHICLES AND TRAVEL

Jobs and routes are planned to reduce unnecessary mileage across our fleet.

Vehicles are serviced and maintained to keep fuel use and emissions down, and engines are not left idling.

4. MATERIALS AND ENERGY

Materials are ordered carefully to limit waste and over-ordering. Responsibly sourced products are chosen where available.

We help customers reduce their own energy use through insulation, efficient heating, heat pumps, solar panels and EV charging.

5. POLLUTION PREVENTION

Sites are managed to prevent pollution of drains, watercourses and land, including the safe storage of fuels, oils and chemicals.

Noise and dust are controlled, particularly in occupied homes and residential streets.

6. REVIEW

This policy is reviewed at least annually.
